

TORRANCE, CALIF.

HE LIKED THE JOB ROCHESTER, N. Y. (UP) — Samuel LaRocco, 37, a laborer, who refused to be "fired," faces a charge of stabbing his foreman, LaRocco, according to police, was discharged by Joseph Pohl, 35, the foreman, but he refused to stop working. Pohl said when he insisted on LaRocco leaving he was stabbed in the thigh.

Balloon Lost; Attention All Points West

GLENDALE, (UP) — There are, of course, chinch bugs in the northwest and locusts in the middle-west, but for all around practical purposes of destruction in a barley patch, a certain San Fernando valley farmer endorses a runaway balloon. The modern menace to the American farmer was given its most successful demonstration in a barley patch near here, when a Goodyear balloon carrying Herbert Moore, student balloonist, settled down unexpectedly. Moore was heading for the Grand Central Air Terminal, 100 yards from the grain patch, at the time, but there is no steering wheel in a balloon. In fact, student balloonists feel lucky if they hit the same continent on the descent, and anyway, Moore's required hour of floating that day ended above the barley field. That may have had something to do with it. Regardless of cause, Moore's balloon settled down just at the edge of the field, but only for an instant. Before he could climb out, a strong gust of wind picked up the big gas bag and carried it across the field, dragging the cage and Moore through the barley. The path laid "low" through the grain was wide.

A Lecture on Christian Science

Richard J. Davis, G.S. of Chelsea, Ill., lecturer of the Mother Church, The First Church of Christ, in Boston, Mass. Mrs. Eddy, the Discoverer and Founder of Christian Science, gave in her sermon entitled "The People's Idea of God" (G. 71) "Scientific discovery and the inspiration of Truth have taught me that the health and character of man become more or less perfect as his mind-models are more or less spiritual." In other words, the character of man is revealed in his thought. "Science and Health with Key to the Scriptures, p. 166; and the Bible clearly indicates the connection between health and character, building, where it says, 'He is essentially dead; but to be spiritually minded is life and peace.' Taking men as a whole, they all appear to be more or less alike in physical appearance. But without thought or ideas, they would all be non-existent. When thought is revealed, however, the distinctive individuality or character of each man shines forth. The teachings of Christian Science, therefore, render the world an inestimable service in bringing to light the true spiritual and mental nature of man, the image or idea of divine Mind. At once, the emphasis is taken away from physicality and placed where it belongs, in the realm of thought. And it is in the realm of thought that man finds his true likeness to God. We declare, therefore, that man is a spiritual being, reflecting or imaging forth ideas or thoughts that can have their origin only in God, the divine Mind. Character of Jesus the Christ. The character of one man, Jesus the Christ, has stood out before men, down through the ages, as the ideal of what we truly should be. He has been called the great Exemplar, the Way-shower. It was to the life and character of this man that Mary Baker Eddy turned in the search which resulted in the discovery of Christian Science. She studied his character, his thoughts and works, and discerned that his words, if properly and scientifically understood, were, as he himself declared, 'Spirit and life in all matters.' Jesus was the Way; that is, he showed us the way in which every man's character can be regenerated through spiritual and scientific thinking. But this does not in any sense imply that he walked the way for us, and that there is nothing for us to do. It is only as men adopt his spiritual standard of living and thinking that they approximate the true character of Christ Jesus. Obviously, it was not his physical body or personal appearance that made Jesus the Christ; it was what he thought. He thought divinely, and Christian Science declares that it is what we think that naturally registers our true spirituality.

Lowest Fares East Ever Offered!

Starting July 1—on sale thru August 31. FROM July 1 to August 31, Southern Pacific's one-way coach fares east will be cut to lower levels than ever before! Good only in coaches, they offer the comfort, speed, safety and scenic attractions of fine trans-continental flyers—at sensationally low cost. Suppose you are going to Chicago. THE VAN DYK HOUSE H-130 By DUNCAN HUNTER, Architect New York. This early Dutch settlers in America left interesting houses. There is a quaint charm to the graceful Dutch roots that is distinctive and characteristic of the style. Another feature of these old houses was the delicate entrance doorway. In many cases, these doorways were so refined in treatment and in detail as to have almost an ornate character, but the effect was not overdone—it was more like a jewel set in an attractive mounting. The Dutch also elaborated their mantelpieces and some of these show exquisite and gorge work that is really intricate. The old Dutch houses do not however meet the demands of modern living. While their broad sweeping roofs unbroken by dormers gave a decided domestic character and charm to the exterior, the interiors, at least the second floor rooms would simply be unlivable—unthinkable, today. One little window high above the floor in the gable end, serving as the only light and ventilation in a large bed room and the ceiling starting about three feet or so above the floor line. Stuff, ventilated rooms that have years since been ruled out in the cheapest of tenements. So these won't do in the Modern home. Results—the old Dutch style has to be modified to meet the demands of Modern living—dormers and plenty of windows must be provided and rooms must have good, clear ceiling heights. Retain the charm of the old detail and provide modern living quarters. The Van Dyk is old in character and Modern in appointments—it lists up like this—Basement: (No plan of which is shown.) Recreation room, laundry, heater space, etc. First floor: Living room, coat closet, sun room, dining room, kitchen, and a one-car motor room. Second floor: Three bed rooms, double hung, with shutters; doors, wood, to special detail. Interiors: Floors, wood; walls, plaster; ceilings, plaster; kitchen, composition tile; bath room, tile; steam heat, gas and electric wiring. Cubiture: 24,000 cubic feet. Complete working plans and specifications of this house are available for a nominal sum. Address: The Building Editor and refer to House H-130.
